Innovative AC Repair Solutions From S.U.R.&R.

Save "Time & Money" Repairing the Three Most Common AC Problems

1. AC line has a pinhole leak or crack and AC system cannot hold a charge

Typical Repair Option: Go to the OE dealer and buy a complete replacement AC line. The cost of a typical OE replacement AC line is \$250 - \$600.

S.U.R. & R. Solution: Simply repair the line using S.U.R.& R.'s innovative compression union. The repair can be done in minutes with a simple three step process:

1. Cut line
2. Install compression union
3. Wrench tight - done!

PROBLEM - Damaged A/C aluminum line

Save Hundreds \$ and up to 4 hours of labor time!

2. AC line is damaged at collar connection and AC system cannot hold a charge

Typical Repair Option: Go to the OE dealer and buy a complete replacement AC line. The cost of a typical OE replacement AC line is \$250 - \$600.

S.U.R. & R. Solution: Simply repair the line using S.U.R.& R.'s Hose-to-Compression Union Adapter and AC hose. The repair can be done in minutes with a simple three step process:

1. Cut line
2. Install compression adaptor and AC hose
3. Wrench tight - done!

PROBLEM - Damaged A/C hose leaking at connection

Save Hundreds \$ and up to 4 hours of labor time!

3. Rear air conditioning line/system is damaged and AC system cannot hold a charge

Typical Repair Option: Replace the entire line going to the rear AC system or a key component (example: rear evaporator or compressor). Cost can exceed \$1,000 dollars.

S.U.R. & R. Solution: Simply block off the rear AC line using S.U.R.& R. Compression Union and Block Off. The repair can be done in minutes with a simple three step process:

1. Cut line
2. Install compression union & block off
3. Wrench tight - done!

PROBLEM - Damaged Rear A/C line or component

Save Several Hundreds \$ and up to 8 hours of labor time!
