

Cumbersome O.E. Fuel Line Replacement Repairs Can Easily Be Completed While Saving Up to 75% on Replacement Line Costs & Installation Time

Typical PROBLEM

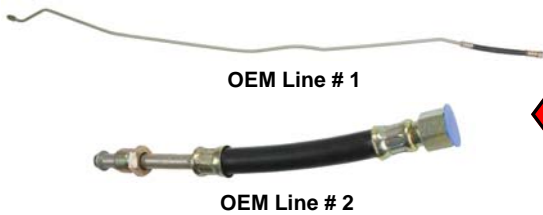

Traditional Repair Option #1: OE replacement fuel lines cost up to \$120 and waiting for an OE replacement fuel line to arrive from the dealer increases shop down time rendering a service bay useless until the part arrives.

Additionally, OE Fuel lines come as a one-piece assembly which requires extra installation time to snake the assembly through the vehicle under-carriage.

SUR&R SOLUTION

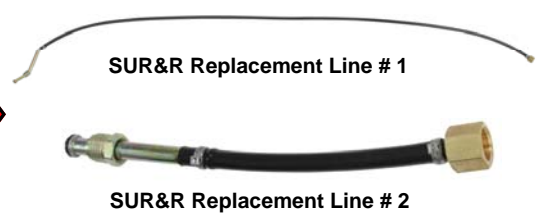

S.U.R.&R. Replacement Fuel Line: The KP1200 and KP1500 kits allow mechanics to easily assemble a replacement line in less than 5 minutes for as little as \$20. This eliminates costly shop down time and maximizes productivity.

S.U.R.&R. replacement fuel lines can be easily assembled, piece-by-piece, without having to snake a long one-piece assembly through the under-carriage.

Repair Option # 2: Using a competitive fuel line repair kit can help save the cost of an OE replacement fuel line, but requires special tools and added labor time to complete the repair.

S.U.R.&R. Quick Connector Technology: Our exclusive universal "Quick Connector" allows for fast easy assembly without any required specialty tools to complete the repair.

Fuel Line Assembly Tool

Fuel Line Disconnect Tool

Exclusive Universal Quick Connector

1. Attach nylon tube to fitting

2. Push on

2. Crimp clamp

95% COVERAGE NETS HUGE SAVINGS!

- Improved Profit Opportunity
- Better Coverage
- Fewer SKU's than Competitive Brands
